Indore, Madhya Pradesh, India | +91 8792155699 | kumarachetuchethan@gmail.com | linkedin.com/in/chethan-kumar-u-00a946245 | chethan-2001.github.io/portfolio-3d/

PROFESSIONAL SUMMARY

Telecom Core Network Operations Engineer at Tech Mahindra, supporting Rakuten Mobile production environments since January 2025. Experience across IMS/EPC network functions, HSS operations, Kubernetes-based CNF/VNF environments, protocol troubleshooting, log and CDR analysis, change execution, patch/upgrade support, and pre-/post-change service validation. Uses Linux CLI, Wireshark, RADCOM and ForeSight to investigate SIP, Diameter, GTP and S1AP-related issues. Brings transferable core-network operations experience relevant to SDM deployment support, integration validation and service assurance.

TECHNICAL SKILLS

Telecom Core: IMS, EPC, VoLTE, 4G/5G Core concepts, International Roaming, HSS, SBC, DRA, STP, CFX (P-/S-CSCF), I-CSCF, PGW, SGW, PCRF, DNS, MRF, MGCF, BGCF, MSS, TAS

Protocols & Analysis: SIP, Diameter, GTP, S1AP, call-flow troubleshooting, packet capture (PCAP) analysis, CDR analysis, transaction logs, service issue investigation

Platforms & Systems: Linux, Kubernetes, CNF, VNF, cloud infrastructure operations, pod access and monitoring, CLI, SSH, Windows

Change & Validation: Standard/Normal/Emergency Change Requests, MOP/RMOP, patch and upgrade support, pre-/post-change health checks, KPI and service validation, pod-to-pod data migration support

Operations: Node health checks, alarm/event monitoring, KPI/SLA monitoring, incident and ITSM ticket management, RCA support, escalation management, vendor coordination, shift handover

Tools: RADCOM, ForeSight, Wireshark, RCP, WinSCP, Xshell, PuTTY, MobaXterm, JIRA, Service Desk, Microsoft Excel

Programming / Data: Python, SQL, HTML, CSS

PROFESSIONAL EXPERIENCE

Tech Mahindra Ltd. - Associate Network Operations Engineer

India | Nov 2024 - Present | Client: Rakuten Mobile (project assignment from Jan 2025)

- Support production IMS Core operations for Rakuten Mobile across Nokia/Mavenir network functions and CNF/VNF-based environments.
- Perform node health checks, alarm monitoring, KPI review, service checks and operational validation across IMS/EPC network functions.
- Support operations for HSS and IMS/EPC nodes including SBC, DRA, STP, CFX (P-/S-CSCF), I-CSCF, PGW, SGW, PCRF, DNS, MRF, MGCF, BGCF, MSS and TAS.
- Troubleshoot IMS/VoLTE call-flow and service issues using RADCOM, ForeSight, Wireshark, RCP, Linux CLI and WinSCP; analyze SIP, Diameter, GTP and S1AP traces/logs and CDRs.
- Access and monitor Kubernetes-based CNF environments, investigate pod-level issues and perform operational checks.
- Execute Standard, Normal and Emergency Change Requests following MOP/RMOP procedures; perform pre- and post-change health, KPI and service validation.
- Support emergency change activities involving data migration between Kubernetes pods, followed by health, service and KPI checks.
- Support Nokia/Mavenir CFX patch and upgrade activities with vendor/L2/L3 coordination and post-change validation.
- Manage ITSM incidents and tickets through investigation, categorization, RCA support, escalation, status updates and closure coordination.
- Monitor customer-impacting issues and protocol-error trends; coordinate escalations with EPC, IMS, RCS, RAN, RF and International Roaming teams.
- Coordinate shift handovers and incident bridges with Japan and India teams; act as shift lead when required.

EDUCATION

B.Tech, Electronics and Communication Engineering - Presidency University, Bengaluru | 2024 | CGPA: 8.29/10

2nd PUC - PCMC - RT Nagar PU College | 2020 | 78.3%

Class 10 - Gnana Bharathi Public School | 2018 | 89.12%

ADDITIONAL INFORMATION

Languages: English, Kannada, Hindi, Telugu; basic Tamil
